NATIONAL  
CHILDREN AND ADULT SERVICES  
CONFERENCE 2018  
MANCHESTER 14-16 NOVEMBER

12.50	<b>10 Digital initiatives that enable Social Care change</b> Socitm Advisory has developed a Benefits4Change © Framework to help local public sector services deliver benefits from enabling technology and new ways of working. From working on hundreds of ICT and Digital projects we have distilled a blend of data and processes that work in practice. The framework can guide organisations through full programme lifecycles from business cases to procurement to implementation to continuous improvement.
13.10	<b>Behavioural Insights Team North – Applying behavioural insights in social care – A whistlestop tour</b> Over the last few years, BIT has been working with councils across the country to apply behavioural science to social care. In this session we'll talk about what we've done - from redesigning the front-door of adult services to using data science to predict demand for children's social care - and what we've learnt
